

Backup

TICKET#	SUMMARY
3879	Cannot download backups from online server due to SSL security reasons.
4134	Please change the backup default settings.

Certificates

TICKET#	SUMMARY
4207	Increase width of name box to show 65 characters at once (without line break).

Crew And Guest Database

TICKET#	SUMMARY
4176	Store initial status in rotation log when creating a new crew member.
4177	Cannot delete users with a comma in the initial username.
4422	Picture on crew id card is 'stretched' but needs to 'fit' instead.

Engine Room Log

TICKET#	SUMMARY
3467	Lock day does not work, data can still be edited.
3677	Deletion of entrypoints will also remove entered readings from round history.
3678	Engine Room log rounds: be able to submit a round without clicking to the end.
3853	Engine Room entry points should support the new layout control for positioning.
4081	Please add an option to add documents/pictures to the daily log.
4335	When doing a round the GA Module should visually mark the current entry point, for example with the same pulsating animation when placing a marker. This would make it easier to find the relevant marker on the map.
4553	The Engine Room Log module ignores the permission "can do rounds from other departments", meaning no one can start/continue a round from any department but their own. The permission "can do rounds with no department" is respected.

Excel Import

TICKET#	SUMMARY
4056	Import sheet with filenames will generate wrong linkdestination data in regards of subfolder if the item has a new subfolder too.
4299	Windows update breaks Excel import.

General

TICKET#	SUMMARY
3682	List views (tables): create a count which shows how many items are on the list.
3847	Replace old GA control with a more sophisticated one.
3850	Apart from the current layout there should be a page to upload and manage additional layout pictures for more detailed views. It should be possible to upload, modify and delete a layout together with a name and an optional description.
3854	For the new layout control there should be a dedicated page. The page should show the layout control with maximal height and width. It should be possible to switch between the defined layouts. It should be possible to see all components, storages and erlog entry points with positions on the currently active layout with filter options.
3963	Add link button to the online manual.
4039	Chrome in the last version (60.0.3112.78) produces display issue in hour counters.
4210	After the trial version of the full crew and guest database module expires IDEA.NET should revert back to the basic version. Instead it blocks the access completely.
4471	Handle invalid news text on home screen.

Installer

TICKET#	SUMMARY
3683	Folder "Reports" missing under "media" after installation.

Leave And Rest

TICKET#	SUMMARY
1721	Implement new module to enter working hours and manage contracts.

Maintenance

TICKET#	SUMMARY
2835	Show last component history details on the "complete maintenance task" screen.
3501	Add a default "vessel" currency.
3880	Maintenance history: cannot click apply button in Firefox.
4105	When using an interval job, the history tab only shows history for this job.
4211	If you select or save a hour counter, set the month filter automatically to latest month which has values.
4224	Update item's "LastEdited" when changing quantity.

Permission Manager

TICKET#	SUMMARY
4058	Permission screen not working in Chrome.

Reminder

TICKET#	SUMMARY
4091	Subquery for "expired crew documents" has been overwritten with a second basequery.

Reporting

TICKET#	SUMMARY
3955	The inventory report "Items by Storage Area" needs a new filter "Storage Name", to limit the report to certain areas by way of keys in the storage name.
3994	Crew list (IMO) should change title to guest list when there are guests accounts available.
4302	Miss spelled "Depature" at the top of the official crew list (IMO Form).
4319	Please add a filter for event based maintenance tasks for technical components reports
4417	"Home" -> "Reports" treeview is supposed to hide reports linked to inactive modules.

Search

TICKET#	SUMMARY
4253	The search shows history for deleted components. The jump to the history then breaks because the component can not be found.

Service

TICKET#	SUMMARY
3886	Service resends emails when "notifications-queue" folder is emptied while it is running.
3887	Cannot create backup when database name contains a dot.

Stock Control

TICKET#	SUMMARY
3852	Storage areas should support the new layout control for positioning.
3878	Active inventory page displays wrong information.
3910	Save button in purchasing module disappears.
3988	Shoppingcart "jump to item" is broken.
4175	Sometimes the details on the 'Addresses' tab are read-only and cannot be edited anymore.
4308	If you create a new address you can setup the address name but if you then edit the several address fields and click on save these entries will be deleted again leaving the fields blank. If you check this address then under Addresses its fields are blank too. When you try to edit the entries under addresses once you hit the save button the website runs into a loop, seemingly open this address over and over again. You can get out of this loop by clicking on another module (or maybe anywhere else). When you go back to the address your changes were saved correctly.

Vessel Database

TICKET#	SUMMARY
3693	Make it possible to change master storage. There are two major problems here: 1. Currently master storage cannot be change on tab "Storage Areas". 2. If the master storage will be changed on tab "Description", the storage which was the master storage before, will be completely removed from the storage areas list of the item! It should still stay there. If the user wants to remove a storage for the item completely, he will do this on "Storage Areas" tab.
3851	Components should support the new layout control for positioning.
3989	Item shortcuts show wrong icon in vessel database.
4021	When expanding the "Items" node all subfolders count their items and shortcuts. Only those with objects in them will display the button to expand (+). This calculation is wrong for items with shortcuts in different subfolders.
4323	Please check if locked domains are really read-only for other departments. There seems to be a caching problem.
4584	Document subfolders look empty if they contain only component/item images.
