

05. November 2018

IDEA Yacht Version 2018.3 released

This version introduces a new graphical user interface and new code library to improve usability and stability. The changes were necessary to guarantee ongoing compatibility with the newest browser and operating systems.

The changes in detail:

- ⑩ new user interface
- ⑩ calendar functionality to plan and trigger event driven maintenance
- ⑩ garbage bin to enable the user to recover deleted database items
- ⑩ extended logbook functionality with logs and rounds for all departments
- ⑩ bugfixes and smaller improvements throughout the software

A detailed overview of all changes can be requested from feedback@idea-data.com.
